

TEAM PAIN

HIRING

CLINICAL RESEARCH ASSISTANTS

Team PAIN is offering clinical research assistant opportunities for students looking for medical and public health experience

WHO IS TEAM PAIN?

Team PAIN works across disciplines to change the way we care for pain. Team PAIN is composed of Michigan OPEN and the Michigan Perioperative & Pain Research Team (MPR).

MPR recruits surgery patients for the Michigan Genomics Initiative. Research assistant responsibilities include patient contact, survey collection, and blood collection for genetic research. The MPR team also recruits for many NIH-funded studies. **Interested? Complete this form**

Michigan OPEN works with physicians, public health experts, policy makers and payers to positively impact the opioid epidemic through improved prescribing and pain management for acute care (surgery, dentistry and emergency medicine). **Interested? Complete this form**

WE ARE SEEKING

Smart, creative problem-solvers dedicated to improving patient care

Interest in the rapidly-changing field of medicine

Students (Undergraduate, Medical, Gap Year)

Available +12 hrs/week

YOU WILL GAIN

Medical Experience

- Recruit, enroll, consent surgical patients for research studies
- Manage blood samples from the hospital staff
- Learn how to use electronic medical records and programs: Epic, Qualtrics and RkStudio
- Develop professional skills

Quality Improvement

- Assist with developing opioid prescribing recommendations
- Work to improve system processes for better patient care
- Contribute to large scale research projects and potential publications

Interdisciplinary Teamwork

- Conduct research alongside physicians, nurses, statisticians, public health, and researchers
- Collaborate with a diverse team
- Be part of something larger than yourself
