

CREATE YOUR OWN SHARPS CONTAINER

Create a safe disposal container from an empty bottle with these features:

- Tight-fitting lid
- Made of strong plastic that cannot be punctured
- Can stand upright on its own

Mark your container with a line at 2/3 full. Keep out of reach of children and pets and avoid touching or breaking sharps when filling the container. When your container is 2/3 full, bring it to a designated disposal location. Do not put into regular trash or recycling.

OPEN is partially funded by the Michigan Department of Health and Human Services.

SHARPS AND LIQUIDS SAFE DISPOSAL

OPEN

Prevention. Treatment. Recovery.

SHARPS

- Use a container made for sharps.
 - If not available, create your own sharps container using instructions on the back.
- Safely collect your sharps.
- Dispose of your container at a specific sharps collection site.

Visit safeneedledisposal.org to find a disposal location near you.

Contact your local government office and ask about household hazardous waste collection events.

Contact your trash service and ask about your container pick-up.

Find a safe disposal location near you.

<https://michigan-open.org/safe-opioid-disposal/>

DO NOT throw needles directly into the trash.

LIQUIDS

- Keep the liquid medication in its original container and take to a disposal site.
 - Try the QR code to find a location near you.
- Ask the pharmacy for an opioid disposal solution when you pick up the prescription.
- Use home disposal options such as a deactivation bag or medication mail-back envelope.
 - Use the QR code for more information.
- Use your trash as a last resort:
 - Mix liquid medication with used coffee grounds or kitty litter in a bag and throw away.
 - Take personal information off of the prescription label before disposal.

DO NOT flush medications down the toilet.
